

NursingCAS™, the Centralized Application Service for undergraduate and graduate nursing programs across the country, provides admissions offices with an improved way to recruit, enroll and admit best-fit students.

Participating institutions report that they are able to process applications more efficiently and effectively, while also expanding their marketing to reach new applicant pools. There is no cost to join NursingCAS; all training, software and support are free to school users/staff.

BENEFITS TO PARTICIPATING SCHOOLS

Facilitates faster and more effective processing of applications

Provides access to strategic admissions data, on-demand customizable reports, comparative data

Offers a customizable application that can include program-specific admissions requirements

Extends your staff with a dedicated support team that processes and verifies transcripts and other documents

Enables schools to market program offerings and open seats, offering additional exposure through a centralized portal

NURSINGCAS QUICK FACTS

NursingCAS charges the following processing fees to applicants:

Undergraduate Programs

\$60 for the first undergraduate-level program and \$45 for each additional program

Graduate Programs

\$80 for the first graduate-level program and \$50 for each additional program

290+

participating AACN member schools across

40+ states

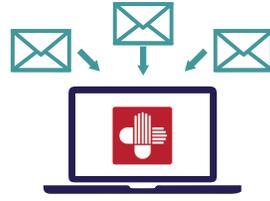

To see a full list of member schools, visit nursingcas.org

BENEFITS TO APPLICANTS

Streamlines the research of hundreds of nursing programs, allowing applicants to find the most suitable options

Simplifies the organization of application materials in one convenient location

Provides access to the NursingCAS service team, which is dedicated to responding to applicant phone calls, emails and chat

HERE'S WHAT SOME OF OUR MEMBERS ARE SAYING ABOUT NURSINGCAS:

More Data, Better Communications

“NursingCAS gives us a big snapshot of our students and where they come from. It helps us understand trends and keep track of who’s applying, who gets in and how we’re admitting people. I’m very impressed by — and grateful for — the amount of data you can manage in NursingCAS and the different ways you can search for and message your applicants.”

Increase of Key Application Metrics

“We have also found that through the use of CAS, our programs have much wider exposure. Not only have we experienced an increase in our applicant pool as well as an increase in the diversity of the applicant pool, but now we’re also drawing more applicants from beyond our region. That’s why I’m such a proponent of NursingCAS. As even more programs continue to join NursingCAS, I think it will provide even more advantages to students and schools.”
